

BREAK THE CHAIN OF INFECTION

TAKING YOU TO THE NEXT LEVEL.

For an infection to develop, each link of this chain must be connected and in sequential order. Break any chain and you stop the transmission of infection.

HOW MUCH ARE HEALTHCARE ACQUIRED INFECTIONS (HAIs) COSTING YOUR FACILITY?

Healthcare-Acquired Infections (HAIs) are becoming increasingly common. Due to an increase in invasive procedures and a growing resistance to antibiotics, HAIs have increased by 36% in the last 20 years. The human cost is over **99,000 deaths per year**, which represent a 5% death rate for HAIs. On average **HAIs add an additional 8 days in the ICU and increases hospital stays for 9 days.**

HOW MUCH DOES THAT MEAN FOR YOUR FACILITY?

HAIs in hospitals alone result in an estimated \$28-\$33 billion in excess medical costs every year. That is an estimated cost of up to \$32,000 per licensed bed in the U.S. For an average 180 bed facility, that equals an additional \$5,760,000 in direct cost. Under the new Affordable Care Act (ACA), Hospitals will lose reimbursement based on a criteria that is heavily weighted on HAIs and patient satisfaction.

INTRODUCING NEXT LEVEL 11'S NEW 3 STEP PROCESS TO HELP IN THE BATTLE AGAINST HAIs.

This 3 step program will enable you to improve patient outcomes and lower your operating cost.

TAKING YOU TO THE NEXT LEVEL.

LET'S TALK

If this all sounds good to you, we should talk. We can help take your business to the next level—to **Level 11**.
