

EXPECT MORE.

Definitive Technology Group has developed solutions that make managing mobile workstations totally efficient. With 3 main offerings, Definitive not only preserves the investment previously made but drives operational efficiencies and bottom-line cost savings.

- ✓ Any Workstation
- ✓ 24/7 Battery Power
- ✓ Zero Maintenance
- ✓ Predictable OPEX
- ✓ Zero Problems
- ✓ Extend the life of your fleet by 10+ years
- ✓ Deal with one supplier
- ✓ Reduce time managing your cart fleet

1 UNINTERRUPTIBLE BATTERY SYSTEM (UBS)

Mobile workstations are key to operational efficiency—and batteries power that workflow.

- UBS is the first power system that allows for on-demand battery power to be added to the mobile workstation, extending runtime when needed.
- The main battery lasts 6-12+hrs, AND you have the opportunity to add on-demand battery power **for 6+ more hours of runtime!**
- Available on new workstations created by any manufacturer.
- Reduce weight by 30-lbs

2 REPOWER

You have spent a lot of money on the carts that are installed and used every day. The power system is the component that needs to be replaced. Definitive can retrofit the Uninterruptible Battery System to your existing carts—which saves a ton of money.

Retrofit to any mobile workstation: ALTUS, CAPSA, Enovate, Ergotron, Touchpoint, etc.

3 TOTALCARE SERVICE

Your carts are out of warranty, problematic and costly for your organization to service and maintain. Definitive's TotalCare service provides ALL preventative maintenance and repairs. Think about it, you never will need to deal with mobile workstations ever again, allowing you to focus on what's important.

As part of TotalCare, Definitive actually gives you a fleet of spare mobile workstations in the event that one of your workstations fail. Definitive Technology will keep you efficient.
