

SternaSafe®

Sternum Security

Do you still have your patients squeeze pillows and folded blankets in an effort to relieve post-sternotomy pain?

Have you asked them if it is really effective?

Introducing SternaSafe UNI®

Better Support, Faster Recovery, More Comfort

**SternaSafe Uni®, with a 2-way operating system.
Easy to handle, comfortable sternum support brace.
Suitable for every patient after sternotomy.**

- *Reduces sternal wound infections & respiratory complications*
 - *Simple operating with new pulley system*
 - *Enhances healing/shorter hospital stay*
 - *Easier coughing and breathing, less pain*
- *Gives patients a feeling of security and comfort*

SternaBra®

Additional sternum wound support for women

SternaBra®, medical bra, is used for extra, permanent sternum wound support after sternotomy. It is advised to add and combine with SternaSafe Uni®, especially for larger women.

The SternaBra® is worn under the clothes and the SternaSafe Uni® is worn over the clothes.

FEATURES

- Adjustable shoulder and side straps
- Special breathable woven cotton materials
- Cross-stitching for steady support

ADVANTAGES

- Softer than normal Bra
- Steady support to breasts and sternum wound
- Easy adjustment and comfortable wearing
- Front opening for direct access to wound
